Research is an original and systematic investigation undertaken to discover new facts and information about a phenomenon. A variety of issues are on the rise in academia, Plagiarism is quickly becoming part of global educational and research culture. Even though copying others ideas is not legal, it is become part of the methodology that ideas and thoughts of previous researchers must be consulted and accepted to further research. Plagiarism means taking the words and thoughts, ideas, concepts, images, sentences of authors etc. and using them without giving credit to him/her or without citing the source.

Anti Plagiarism softwares prevent researchers from copying the work of other scholars and taking credit for it. The aim of the workshop is to familiarize the anti plagiarism softwares, their uses, provide hands on training in using the different plagiarism softwares to check a research work and to explain how to avoid plagiarism and to correct plagiarized work.

Objectives of the Workshop

The aim of the workshop is to providing a hands on training for participants on different anti-plagiarism softwares and help them to check their own research works on the same.

There will be a demo of selected Anti- Plagiarism softwares: Turnitin, URKUND, Viper, Plagiarism Checker and PaperRater

Target Audience

Research Guides, Teaching Faculties, Library Professionals, Research scholars, Post Graduate students and those who are interested in this subject area.
